## PROFESSIONAL EXPERIENCE

---

### SVITLA SYSTEMS Senior iOS Engineer

Lviv, Ukraine  
Sep 2024 - Present

- Rejoined a project I had previously contributed to and currently serve as a Senior iOS Engineer, overseeing core feature development for an app with over **1.2 million** active weekly users.
- Implement innovative features, ensuring the successful delivery of high-impact solutions.
- Focus on optimizing key areas of the codebase to enhance user experience and maintain seamless app performance.
- Lead the implementation of complex architectural solutions to improve core functionality.
- Contribute to the development of key features and resolve challenging technical issues.

### VIBER RAKUTEN, INC. Senior iOS Developer

Lviv, Ukraine  
Oct 2023 - Sep 2024

- Working as a key engineer who is responsible for the iOS SDK development that serves advertisements to more than **1.3 billion** of users, enlarging the revenue of the company.
- Innovatively integrating new advertising providers into the application, augmenting revenue streams and diversifying income sources for the company.
- Designing sophisticated architectural solutions for fundamental operations, participating in the enhancement of crucial functionalities, and addressing intricate technical challenges related to the optimization.

### SVITLA SYSTEMS Senior iOS Developer

United States (Remote)  
Jun 2021 - Oct 2023

- Served as a key member of the iOS team, delivering regular app releases on a quarterly basis for an app with over 930k+ active users per week.
- Acted as the representative for the iOS team in annual Hackathons, contributing to the development of innovative features that resulted in a 1st-place victory.
- Successfully resolved critical deep-links issues within the project, leading to a remarkable 15% increase in daily active users.
- Implemented complex architectural solutions for core functionality, contributing to the development of key features and resolving challenging technical issues.

### GLOBAL LOGIC iOS Developer

Lviv, Ukraine  
Mar 2019 - Jun 2021

- Elaborated the core functionality of an application with complex architectural solutions, so the other 9 team members could build up functionality based on it.
- Represented a team of 9 iOS developers to a customer and other engineering teams gathering requirements and transferred them to teammates.
- Mentored 4 developers by sharing knowledge of best practices, standards, and experiences, while removing roadblocks/challenges.
- Stabilized CarPlay and Ford auto integration usage for a Top 10 Application in Music Category in App Store.
- Initiated meetings for sharing technical knowledge on the project, so the development process went 15% faster.

**SCOPIC SOFTWARE**  
**iOS Developer**

**United States (Remote)**  
**Sep 2018 - Feb 2019**

- Covered 80% of the library that interacted with Bluetooth Low Energy devices with Unit Tests.
- Gathered requirements and technical details directly from the client and implemented in the project.
- Developed a part of the application that allowed customers to receive orders 20% faster.
- Created the biggest part of functionality and design solutions in a project that had 4 iOS developers.
- Facilitated a team to build a scalable software product implementing pixel-perfect UI and business logic.

**VAKOMS**  
**iOS Developer**

**Lviv, Ukraine**  
**Sep 2017 - Sep 2018**

- Fixed more than 2000 errors/warnings while migrating an app from Swift 2.2 to Swift 4.0.
- Collected requirements directly from the customer and implemented them in the project.
- Developed a Proof of Concept(PoC) that resulted into project acquisition for the company.
- Created more than 300 different dialog windows for the HIPAA compliant application utilized by medical clinics all over the world.

**UNIQA TECH**  
**iOS Developer**

**Lviv, Ukraine**  
**Feb 2017 - Sep 2017**

- Fixed 100+ bugs, which resulted in a smoother user experience.
- Finished a project 30% ahead of schedule because of persistent work.
- Cooperated with the lead developer to deliver an application 3 months ahead of schedule.
- Elaborated pixel-perfect UI and the business logic for an application based on Geolocation.

**EDUCATION**

---
